Don't Pass The Pool Elevator

The best method of advancing the interests of Alberta grain growers is to see that every possible bushel of grain goes to an Alberta Pool elevator.

ALBERTA POOL ELEVATORS
Operating for the benefit of Alberta grain growers.

Oyen School Fair Tuesday, September 20

On Tuesday next week, September 20, Oyen school fair will be held. The schools parade, which has been a feature of previous fairs, will be omitted this year, but it is expected that a very keen interest will be taken in the physical training exercises. A heavy entry in the hall exhibit classes is looked for. Physical training exercises will commence at 1 o'clock in front of the grand stand. Teachers in charge are asked to report to Mr. Chas. L. Dunford on the fair grounds at 12:30.

Chautauqua Here Oct. 12-13-14-15

A four-day circuit of Canadian Chautauquas will open in Oyen on Wednesday, October 12. A well varied program of high class entertainment is promised.

Duck Shooting Season Opens Thurs. Oct. 15

The season for duck shooting in this part of the province opens tomorrow (Sept. 15) and closes November 14. The license for residents of the province to hunt game birds is advanced to \$2.50 this year and it is possible that the increase in price of such license, may give the birds some respite from the local minors.

The open season for prairie chicken and Hungarian partridge does not open till October 15, and closes for the former October 15. The partridge season is open till November 30.

Heavy Rainfall Halts Threshing Operations

Following the hot dry weather of the fore part of last week, a break occurred Thursday when light intermittent showers fell during the day followed by a heavy downpour during the night, for a total precipitation of 1.28 inch.

Light scattered showers occurred Sunday evening, and this morning. These, fortunately were almost negligible, and a few drizzles started today, and with fine weather over night, threshing will be general again tomorrow.

M. D. Golden Centre

The 8th meeting of the council of the municipal district of Golden Centre No. 272, was held at the N.E. 13-30-5, on Saturday Sept. 10, at 2 o'clock p.m. Members were all present except Councillor Jorgensen.

Business transacted was of a routine nature. The financial statement to August 30, was read and accepted, and all outstanding accounts were paid. Council adjourned to meet at the north-east quarter of 13-30-5 on Saturday, October 1, at 10:00 o'clock a.m.

Sale of farm implements, machinery, livestock etc., at the farm of Mr. Fred Langford on 28-26-3, Thursday, Sept. 29.

GRAIN EXPORT QUESTION WILL BE DISCUSSED

Winnipeg, Man.—For the purpose of discussing with the grain and milling interests in the United Kingdom and on the continent the standards generally of Canadian export grain, E. B. Ramsay, chairman of the board of grain commissioners for Canada, will shortly leave for Europe.

Inquiries will be made especially into the question of Garnet wheat and practical methods sought for dealing with this variety of grain, either as a separately graded variety, as recommended by both the western grain standards board and the agricultural committee of the House of Commons, or as at present graded under the Canada Grain Act, which allows the Garnet to go into the Northern grades of red spring wheat, but not to grade higher than No. 2 Northern.

Mr. Ramsay will be accompanied by J. Rayner, secretary of the board of grain commissioners, and will be met on the other side by Dr. F. J. Birchard, chemist to the board, who has been attending a bread exhibition at Rome.

May Be Deported

Rumored That Doughboy Leader Has Been Served With Papers

Yorkton, Sask.—It has been learned here on high authority that Peter Vergin, Doughboy leader now serving an 18-month term in Prince Albert Jail, following a conviction for perjury, has been served with deportation papers by the warden on behalf of the Department of Immigration.

Serving of these papers, it is understood, followed investigation reported to have been made by the immigration department through the Saskatchewan attorney-general's department. Formal proceedings may require considerable time as there is the right of defence as well as the right of appeal.

Mr. Vergin did not come to Canada direct from Russia, having lived in Germany for a time before sailing from Hamburg.

A man prominent in Doughboy affairs stated here recently that Vergin would have nothing better than to return to Germany, as he is a great supporter of the German cause.

Under the Immigration Act, a person who is not a Canadian citizen may be deported if he has been convicted of a criminal offence in Canada.

Think Panic Has Passed

Bank Letter Sees a Period Of Reconstruction Ahead

Toronto, Ont.—The Canadian Bank of Commerce, in its monthly news letter, made public here, saw in rising security prices evidence of a period of reconstruction.

"A few important developments," the letter said, "would seem to indicate that the period of panic has passed and that an era of reconstruction is ahead."

While the letter made much of the general improvement to international action levied at the forces of depression, it added conditions throughout Canada showed signs of recovery in themselves.

Recovery of sentiment in the west, improved crop conditions and prospects over those of last year, and the willingness of Canadian financial institutions to back sound expansion of business, it said, promised greater activity.

Railway and Truck Problem

Must Give Thirty Days' Notice To Cancel Rate Schedule

Ottawa, Ont.—The board of railway commissioners, in a judgment handed down, appreciated the problems set up by highway truck and water competition, but denied the railways right to cancel freight schedules with less than 30 days notice.

The railways had argued that when freight rates were lowered to meet competition on the promises of shippers that they would use the rail bus and water carriers promptly lowered their rates and the shippers failed to reduce their promises. They asked the right to make changes in their schedules with no more than five days notice.

The commissioners held that the 30-day notice was statutory and could not be disturbed.

W. N. U. 1959

Study British Markets

To Take Advantage Of Trade Agreement Reached At Conference

Ottawa, Ont.—At the coming session, parliament will likely be asked to take steps to enable Canada to participate in the advantages offered by the trade agreement entered into at the Imperial Economic Conference. A careful study of the markets in the United Kingdom is being made by the Department of Agriculture in Ottawa. A campaign for increased hog production is one of the projects under consideration.

One of the surprises has been the low prices for live cattle in the United Kingdom. Canada shipped no cattle to Britain last week and up to the present the department has received no information of any being shipped this week. The chief reason is that Canadian domestic prices have advanced above United Kingdom prices when shipping costs are taken into consideration.

Despite the 20 per cent. duty on Irish cattle, beef prices in Britain are low. Bacon is exceedingly cheap in Britain just now and in great abundance so that its consumption has materially increased. Lamb and mutton are also in great abundance.

A heavy movement of western cattle to the Ontario farms this fall is expected. The live cattle market is always the best in Britain in the winter and with so great an abundance of feed in Ontario this year, plans are being made to buy western cattle to fatten during the winter, and have them ready for export in the spring.

Loading Wheat At Churchill

Fifth Ship Arrives At Northern Port To Load Cargo For Cardiff

Churchill, Man.—After battling gales, fog, and ice in the North Atlantic, the fifth ship to load wheat at Churchill, the S.S. Grethhead of London arrived September 7th, and 20 minutes later was loading 26,000 bushels of wheat for Cardiff.

The "Grethhead" is the fifth ship to load grain here this year. She expects to discharge her cargo in Cardiff in two weeks.

Capt. Thomas Griffiths, of the Hainline Lines, said he was bothered somewhat by ice in the strait. The ship does not carry a gyro compass. Officers said such a compass was necessary in Hudson Bay. The M. H. Lady Lewis, carrying a party of government geologists of Ottawa who have been working in the area, is reported off Cape Ekolimo, en route here.

Commissioner Of Excise

Toronto Investment Banker To Succeed G. W. Taylor, Who Has Resigned

Ottawa, Ont.—Hugh D. Scully, investment banker, Toronto, will be appointed Dominion commissioner of excise. He will succeed G. W. Taylor, who has resigned.

Mr. Scully will bring to his new duties a wide experience in finance and investment. For some time he has been associated with the Canadian Manufacturers' Association, occupying the position of assistant secretary in that organization. He was also active in connection with the automotive industry, and since 1922 has been a member of the firm of Stewart, Scully, Company, investment bankers.

Mr. Taylor retires from the post of commissioner of excise on October 1.

Woolen Mill Project

Scotch Firm May Establish Mill In Calgary

Calgary, Alberta.—Dr. A. Oliver, owner of two idle woolen mills at Galashiels, Scotland, has offered to dismantle one and establish it in Calgary, Alderman H. W. Weir told members of a Calgary service club.

If plans are successfully completed, Alderman Weir said, the mill would employ 700 men. He indicated, however, plans were still in an early stage.

Had Porcine Rids

Metzette, Wyo.—Unknown to Pilot Bill Monday, young Jerry O'Leary grabbed the tail of Monday's plane and rode aloft 1,000 feet before being grizzly as the ship wavered with its rear-end weight. When the pilot found out what was wrong he landed without injuring O'Leary.

Leaders To Visit London

Singha, India.—Native leaders of British India are to visit London again and, with the king-emperor's ministers, attempt to complete a settlement of their country's political future.

Western Wheat Production

Estimate For This Year Places Crop At 426,513,000 Bushels

Winnipeg, Man.—The wheat fields of western Canada will produce 426,513,000 bushels of wheat this year, according to the annual estimate of grain crops compiled by the Winnipeg Free Press. Saskatchewan's production is placed at 217,600,000 bushels, Alberta's at 165,120,000 bushels, and Manitoba's at 43,793,000 bushels.

Although the Saskatchewan wheat acreage is the largest of the three, the estimated average yield in that province is lower than in the others. It is placed at 14 bushels to the acre. Estimates on coarse grain crops place the oat yield in the three provinces at 257,181,000 bushels; barley at 66,445,000 bushels; rye at 3,975,900 bushels, and flax at 9,555,900 bushels.

Manchester Cotton Strike

Employers Have Expressed A Willingness To Arbitrate

Manchester, England.—A ray of hope appeared in the Lancashire weavers' situation when employers expressed a willingness to arbitrate. During the meeting, lasting half an hour, the Cotton Spinners and Manufacturers Association central committee drafted its reply to the offer of Sir Henry Brett, Minister of Labor, to sponsor a meeting with union leaders. The association said it would attend such a meeting, if invited.

A union representative commented that the action was a surprise and the employers had gone further toward settlement of the issues than was expected.

TO INVESTIGATE SHORTAGES IN COLLEGE FUNDS

Winnipeg, Man.—Investigation by a judicial committee of facts surrounding shortages in University of Manitoba endowment funds was unofficially promised by Hon. R. A. Hoey, Minister of Education and acting premier. Mr. Hoey also stated he would recommend restoration of university funds.

The government will undoubtedly make restitution of the funds at some time in the future," Mr. Hoey said, "but they cannot, of course, do so until after the matter has been thoroughly threshed out in the courts and by a judicial commission, if, as I understand it, it is the intention of the government to appoint such a commission to fix the ultimate responsibility of the loss."

"The matter is purely one of government policy," Mr. Hoey continued. "It is not a question for decision by any one member of the cabinet, it must await the decision of the cabinet as a whole."

The inquiry in connection with the university endowments will have no bearing on the similar position of the Anglican church. This will be dealt with by church authorities. According to S. Gould, Toronto, general secretary of the missionary society of the Church of England in Canada, held a conference with His Grace Archbishop I. O. Stringer of the diocese of Rupert's Land. He will also spend some time in the west discussing the missionary work with heads of the missionary societies.

UNITED STATES AMBASSADOR TO CANADA RESIGNS

It is with regret that Canadians learn of the resignation of Col. MacNider, United States Ambassador to the Dominion, who will return to Washington. Col. and Mrs. MacNider have become very popular at the Canadian Capital. The Ambassador is pictured above (left) with a close-up of Mrs. MacNider.

POPULAR REAR ADMIRAL

It is understood that Rear Admiral Evans, "Evans of the Broke" fame, is to succeed Vice Admiral H. J. Tweedie as Commander-in-Chief of the African Station of the British Navy. The popular Rear Admiral is pictured above.

Evils Of Waste

Lord Bessborough Refers To Economic Troubles Of The World

Vancouver, B.C.—Evil of waste—waste of substance, of opportunity, and most important of all, waste of energy and human effort through lack of co-ordination—that, in the opinion of Lord Bessborough, governor-general of Canada, is the worst of all evils from which the world is suffering.

So he expressed himself in an address here recently before a gathering of city service clubs.

"It is a very fashionable amusement nowadays to try to diagnose maladies from which the world is suffering. Nearly all of us fancy ourselves world doctors and like to think we could put things right if we were allowed to administer our own financial economic pill, our own financial tonic."

"Though we may differ about the right cure, though we are by no means unanimous about symptoms, there is one general principle on which I think we are agreed—that, in the worst evils we have to overcome is waste."

Men Return To Work

C.P.R. Shop Departments, Winnipeg, Operating On Short Time

Winnipeg, Man.—Nearly 1,200 employees of the Canadian Pacific Railway's locomotive department here, returned for 12 days' work in September, in addition to the 700 men of the car department who were taken on again on September 1 to work for 21 days, according to an announcement of the company.

All men will continue to be employed on the basis of a 40-hour week and no extra help will be taken on, the announcement added.

The employees of the car department worked 22 days in August, a considerable increase over the previous month, made possible by the necessity of preparing additional grain cars to take care of the large grain crop expected this year.

Tariff Helps Canada

Ottawa, Ont.—Considerable benefit to Canadian trade with Australia is seen in the tariff amendments introduced in the Commonwealth budget according to the Canadian trade commissioner at Melbourne, D. H. Ross.

Beauharnois Project

Plans Forwest For Expenditure Of Fifty Million Dollars

Ottawa, Ont.—Plans for the general works of the \$50,000,000 Beauharnois project have been approved by the Dominion Government. Official announcement to this effect was made recently.

The plans given the stamp of approval include the 14-mile Beauharnois canal between Lake St. Louis and Lake St. Francis, near Montreal, which will shortly be conveyed by the company to the Dominion.

Passing of the order-in-council sanctioning the plans removes any obstacle in the way of the Beauharnois concern fulfilling its contract with the Ontario Hydro commission on October 1. According to the terms of this contract the company will make 35,000 horse-power available on that date for the use of the commission.

This amount is to be increased gradually until a total of 250,000 horse-power is placed at the disposal of the Hydro authorities at the end of five years.

Signing of the agreement by the Dominion and the company for the transfer of the canal to Canada is expected to take place shortly.

Relief For Veterans

To Be Equalized

Will Be On Same Basis As For Others

Ottawa, Ont.—Not to war pensioners, where less than granted to civilians by municipalities, will be placed on the same relief basis as the granted by the municipalities, the department of pensions and national health announced, in confirmation of a principle announced at Calgary by the Prime Minister.

Mr. Bennett was quoted as having said that the unemployed veterans who are granted their pensions increased to conform with the relief rate paid by municipalities. This, the department officials explained, was technically incorrect. Not the pension rate but the relief rate would be raised, they said.

Veterans receiving small pensions, were barred from receipt of relief and received less than other unemployed. The attention of Premier Bennett was drawn to the situation by a resolution sent him by the Winnipeg Legion command.

UNION CABINET

PLAN MAY SOLVE B. C. DIFFICULTIES

The trade and commerce department points out that what is impossible to identify and in a similar manner, the Canadian customs service has imposed full tariffs on Canadian goods. Lumber sent from British Columbia to Ontario through Vancouver has been taxed at the maximum duties on the ground that nobody could tell if it was Canadian or U.S. lumber.

The department has preference will not be clear until the commerce treaties are approved by the British Parliament, the wheat preference enacted and the regulations governing it issued.

The Premier said he would shortly issue a statement which will include a clause favoring the establishment of a union government composed of "men, who, regardless of other considerations, appear to be able to render the best service to the state," and "along the lines of the National Government in England," as the best method of meeting present conditions.

The announcement is the first break in the hazy atmosphere of political rumor that has enveloped the province for many months. Those who have stood undecided as to what would happen and what they would do when it did happen, must now decide whether to support or oppose the plan, which will presumably have an early chance to say whether they have done well.

Though events may be expected to move rapidly, some little time will probably be necessary to clarify the situation. It is not thought that Premier Train's plans are close at hand as yet. He is conferring with W. J. Bowser, K.C., former Conservative premier, who is regarded as playing an important role in the situation.

In all probability the premier will go ahead with his plans regardless of who joins or who stays out. In the immediate future, the legislature would be called together, the new government's programme presented, and an appeal made to the people on all points.

MEAGRE RESULTS OBTAINED FROM ARMS PARLEY

Newcastle, England.—Disappointment and dissatisfaction is widespread in England and other countries over the meagre results of the first six months of effort at the world disarmament conference at Geneva, Arthur Henderson, Labor leader, and president of the disarmament conference, told the Trades Union Congress here.

It was Mr. Henderson's first public announcement on disarmament since the adjournment of the Geneva conference. He said he frankly confessed the results were far from what he had expected.

A critical situation was created, he said, by Germany's demand for arms equality. The suggestion was made that Germany leave the conference, because it would now be impossible to achieve success there, but this course, he added, would mean disaster.

"It would lead certainly," he said, "to a renewal and intensification of the old optimistic race for armaments."

Although the results to date were not encouraging, he added, it is too early to declare the conference a failure. "I have refused to contemplate the possibility of doing so now," he said. "There has never been a conference with a greater public opinion behind it than this."

The Wheat Preference

Question Of Great Importance To Western Grain Growers

Ottawa, Ont.—Will the five-cent preference on Canadian wheat exported to Britain apply only to wheat exported through Canadian ports? This question has been actively canvassed at Ottawa and there is a good deal of variation in opinion between the different departments.

The question is of importance to western grain growers, since the preference will probably come into operation early in October, before the new crop is ready in the export trade.

The department of national revenue, which administers the Canadian tariff, is inclined to think that any Canadian wheat proceeding to Britain through the United States must be treated as such.

The trade and commerce department points out that what is impossible to identify and in a similar manner, the Canadian customs service has imposed full tariffs on Canadian goods. Lumber sent from British Columbia to Ontario through Vancouver has been taxed at the maximum duties on the ground that nobody could tell if it was Canadian or U.S. lumber.

The department has preference will not be clear until the commerce treaties are approved by the British Parliament, the wheat preference enacted and the regulations governing it issued.

Population Of Vancouver

Greater Vancouver Population Now Given As 398,349

Ottawa, Ont.—Population contained within the area designated as Greater Vancouver, according to the census of 1931, is placed at 398,349. It is reported by the Dominion Bureau of Statistics. The distribution by locations is: Burnaby district municipality, 25,564; New Westminster city, 17,524; North Vancouver district municipality, 4,788; West Vancouver district municipality, 4,788; North Vancouver city, 8,510; University endowment area, 575; Vancouver city, 246,593.

Not So Many Failures

New York, N.Y.—What is described as an "astounding drop" in business failures is reported by Bradstreet's Weekly, covering the first week of August. Failures declined from 527 the preceding week to 425 for the week ended September 1. It was the smallest total for any week since November, 1931.

Police Veterans Return

Ottawa, Ont.—Headquarters of the Royal Canadian Mounted Police announced the retirement of Inspector Robert Hunsby after a long period of service. Inspector Hunsby served most of his time in Western Canada, and was lately stationed at Prince Albert, Sask. He had been inspector since 1914.

Police Veterans Return

Ottawa, Ont.—Headquarters of the Royal Canadian Mounted Police announced the retirement of Inspector Robert Hunsby after a long period of service. Inspector Hunsby served most of his time in Western Canada, and was lately stationed at Prince Albert, Sask. He had been inspector since 1914.

National Advisory Council To Direct Co-ordination Of Agricultural Services In Canada

Domestic and provincial agricultural officials at Toronto concentrated on a study of the livestock industry to find ways of making it pay better dividends to the Canadian farmer.

The conference, called by Hon. Robert Weir, Federal Minister of Agriculture, also considered the establishment of a national advisory council to direct co-ordination of agricultural services throughout the Dominion. Such a council would co-operate with the national research council already in existence, explained Mr. Weir.

Samuel E. Todd, secretary of the Industrial Council of the Canadian Meat Packers' Association, told the 100 delegates that henceforth the packing houses of this country would be inspected by government inspectors to inspect hog carcasses "on the rail" in the abattoirs. This practice will help Canada meet Danish competition in the United Kingdom market, it is expected. For some time Danish bacon producers have had the advantage of government inspection in the killing plant, while inspection in Canada has been made "on the hoof."

The job of agricultural officials and farmers, it was agreed, is to take full advantage of the 280,000,000 pounds bacon quota offered Canada by the United Kingdom, a quota much greater than the total annual production of Canada for 1931.

The conference also tackled the problem of marketing beef. Dean Shaw of the University of Saskatchewan, called attention to the market for finished beef in the United Kingdom, and pointed out that wheat is an ideal finishing feed for cattle. "There is just as much opportunity for the sale of comparatively poor quality cattle in certain markets as there is for the highly finished animal preferred in the big London steers," he added.

Dean Shaw declared continuity of supply was an even more important requirement than quality in the United Kingdom market, because farmers supplying a trade here could not afford to disappoint or lose their customers.

Irish Free State competition is a standard for the moment, said Dean Shaw, but he felt more Irish cattle would come to the fore again sooner or later.

The conference set up a special committee to consider beef marketing, with the following members: Dean Shaw, Prof. J. C. Stockley, of the Ontario Agricultural College, Guelph; J. H. Evans, Deputy Minister of Agriculture for Manitoba; R. S. Hamer and P. E. Light, of the Dominion Livestock Branch, Ottawa. Hon. Robert Weir suggested that provincial agricultural farm advisory committees of their own to discuss their own problems from an administrative standpoint, and from the standpoint of extension. "They will also," he explained, "bring up in these committees questions of further research into the difficulties and problems affecting the progress of agriculture in that province."

In many cases, however, said Mr. Weir, other provinces might have identical the same problems. "Are they going to endeavor to solve them themselves or co-operate with other provincial and federal interests?" he asked. "There must be some one to whom they submit it to see if the problem is really provincial or national, also to ascertain what information in respect to it is already available. That is my idea of what this national advisory council should do."

Alaska's king salmon run this year is reported excellent.

A salmon has been timed to swim 30 yards in one second.

"Do you believe in the devil?"
"Rather. I married his sister."
—Montague, Charlton.

Doctors' Opinion On Alcohol As Medicine

Beneficial In Some Diseases But Injurious In Others

Alcohol has been found beneficial in treating some diseases but injurious in others by Dr. Harold E. Himwich and Dr. Louis H. Nahum, of the Yale medical school.

Results of their study showing that alcohol increases the acidity of the blood to points formerly believed incompatible with life were made public at the international congress of the Federation of Societies for Experimental Biology held at New Haven, Conn.

Some diseases such as tetany, where the blood contains an abnormal amount of alkaline substances, the scientists determined the actions of alcohol acts as neutralizing agent. Small doses of alcohol were found to be helpful in treating diabetes, for they contract the effects of partially oxidized fatty acids.

On the other hand, the research showed administration of alcohol to pneumonia patients delays recovery by increasing acidity.

The "hangover" following intoxication, they concluded is caused by the accumulation and persistence of acetic acid in the blood. This substance, which does not disappear as quickly as the alcohol, also is found after strenuous physical exercise and is believed responsible for a feeling of fatigue after hard work.

On the other hand, the research showed administration of alcohol to pneumonia patients delays recovery by increasing acidity.

The "hangover" following intoxication, they concluded is caused by the accumulation and persistence of acetic acid in the blood. On the other hand, the research showed administration of alcohol to pneumonia patients delays recovery by increasing acidity.

The "hangover" following intoxication, they concluded is caused by the accumulation and persistence of acetic acid in the blood. This substance, which does not disappear as quickly as the alcohol, also is found after strenuous physical exercise and is believed responsible for a feeling of fatigue after hard work.

BLOOMER DRESS EVER POPULAR WITH TINY MAIDS FOR PLAYTIME

She can't have too many! Isn't this a cute dress? The French yoke provides excellent theme for contrast. The skirt falls from the yoke, makes it swing about so prettily in motion. It can be made with tiny muffed sleeves as in miniature view.

So many materials would be suitable for to fashion it. It takes the minimum amount.

The one sketched is French blue with white dots in bustle. The yoke is plain blue with plain white ruffing. Style No. 854 is designed for sizes 2, 4 and 6 years.

Size 4 requires 2 1/2 yards 33-inch with 1/4 yard 23-inch contrasting.

Pique, cotton broadcloth prints, linen, rayon novelties and wool crepe are sturdy and smart suggestions.

Price of pattern 25 cents in stamps or coin (coin is preferred). Wrap cuts carefully.

My wife runs an new machine splendidly: never speeds so fast she can't stop within a foot or two; always pays attention to her wheel; never starts one way, and then with out reason turns off in another direction; threads her way around corners perfectly.

"What makes is the car?"

"Car? It's a sewing machine."

Holland bought all the salt shipped in a recent month from Kansas.

AS MOTHER NATURE PUT ON HER WONDERFUL SHOW

Here is a complete photographic record of the great show put on by the two great celestial stars, Old Sol and Luna. Many astronomers who came from all parts of the world were denied a view like this owing to the presence of clouds. But our high-flying cameraman at Pysburgh, Me., went above the clouds, into the very wings of the clouds. The picture at the lower left is a picture of the complete eclipse while various phases are shown in the rest of the picture.

The picture at the lower left shows President Hoover as he watched the phenomenon from the portico of the White House. The picture at lower right is an interesting shot made during totality. It shows the top of the cloudbank illuminated by the light from the corona. The earth was in darkness then.

Holsteins Capture Honors

Entries From C.P.R. Farm At Strathmore Have Winning Streak

Making its annual invasion of the Pacific Coast to compete against British Columbia's best, the famous Holstein herd from the Canadian Pacific Railway's supply farm at Strathmore, Alberta, secured honors for junior champion bull, reserve senior and junior champion bull, senior and junior champion bull, first prize for senior calf, yearling female, senior yearling bull and a string of lesser ribbons at the Canada Pacific Exhibition in Vancouver.

Strathmore McKinley Emperor, junior champion was barely noted out of grand championship honors by Treat Burke of Crystal Spring, entry of Paul and Sons, Chilliwack, but Strathmore Colony Koba Fairchild and Strathmore McKinley Senator won both reserve championships for senior and junior bulls for the C.P.R. supply farm.

Strathmore Designer took first for bulls over three and under four years and the railway farm scored again with Strathmore McKinley Senator, an all-white, which was the judge's first choice among senior yearling bulls.

Senior calf honors also went to the Strathmore herd which carried off two more first prizes for four-year-old cows in milk and senior yearling female. McKinley Johanna, from Strathmore, was judged best senior calf, with another C.P.R. entry, Strathmore Aggie Rose, placing second.

The Horse Comes Back

Draught Animals Being Used More Extensively Than For Some Years Past

Horses are being used more extensively in harvesting in western Canada this year than for some years past. Low prices have forced farmers to cut down expenses in every possible way and the new fangled motor has been replaced by the horse of earlier days.

Gasoline costs money and even farmers who have power machinery find it more practicable to get horses in operation than to buy gasoline and fix their motor equipment.

The relative merits of horse and motor power in farm operations have never been settled. Many successful farmers have steadily refused to install power harvesting equipment and they find confirmation of their views in the tendency to go back to the horse under pressure of hard times.

Whether the present situation indicates a permanent trend is another question, however. Little new machinery has been purchased this year but those farmers who have up-to-date power equipment and are not too sharply pressed for ready money prefer to continue using it and are doing so.

Probably Locust Beasts

That the locusts eaten by John the Baptist were probably not insects, but the fruit of the carob tree, the dried fruit of which are the locust beans now sold as food for cattle, is the declaration of a European scientist. The carob tree is sometimes called the honey tree because of the sweet pulp in its fresh pods.

Damp and Tough Grain May Now Be Dried Without Damage To Its Milling and Baking Qualities

Canada need not again suffer the losses sustained when the percentage of tough and damp grain in the crops of 1929 to 1932 reached unprecedented heights ranging from 28.6 to 50.8 and the cash deductions to Canadian farmers totalled millions of dollars.

Artificial drying of wheat was one of the first problems to which the National Research Council's Associated Committee on Grain Research set its hand. In 1929 a report was issued which set out the conditions of correct artificial drying that practically all causes of complaint against Canadian grain on the score of damage incurred during drying were removed. There has now been issued a comprehensive document of 104 printed pages, which confirms the specific points laid down in the first report, clears up a number of additional points and demonstrates what conditions contribute to the efficiency of commercial driers.

Damp and tough grain may now be dried without damage to its milling and baking quality. Included in the present report are discussions of a small-scale experimental drier designed for the study of the limits of safety in drying with regard to air flow, air temperatures and extent of drying in both counter-current and batch drying of wheat. Other aspects of the problem discussed are factors in continuous drying, losses in cold weather, drying in stages, drying with humidified air, excessive drying, invisible loss in drying, atmospheric humidity in relation to grain drying, weight per bushel in relation to drying and the nature of injury caused by heat drying.

In three important appendices are discussions of observations made in commercial driers in Vancouver with reference for improved operation, a review of the literature on the bin drying of wheat (drying by natural ventilation; drying by forced, unheated air; drying by forced heated air and "swelling") and the influence of heat treatment on the baking behaviour of flour is determined by different baking formulas.

Copies of the appendix containing the review of the literature on the bin drying of wheat have been made available separately.

In making the investigations involved the committee developed a system of dividing all samples of grain tested into three or four parts and checking the milling and baking results independently in three or four laboratories, using methods which were carefully standardized by frequent consultation and comparison. It was considered important not to draw any far-reaching conclusions which might mean millions of dollars one way or the other to the grain growers and the grain trade, without verifying results in more than one laboratory. The system inaugurated in this, the first large co-operative undertaking of the Associated Committee on Grain Research, has been followed in all later work, and has had the effect of inspiring confidence in published conclusions of the Committee.

The authors of the report now published...

With this report the organizing of hunting parties is carried on at many points in the Rockies, and by the first of September the trek of sportsmen to the great game haunts takes place. Splendid trophies may be secured of mountain sheep, goats, caribou, moose, bear and deer, but the modern hunter is becoming more and more an addie to the camera, either still or movie. Instead of returning with a load of heads, he content himself with far more convincing records of his hunting prowess in the form of films. The camera hunter has the double satisfaction in knowing that the subject might have fallen an easy victim to his modern high-powered rifle, but still lives, free to enjoy life in its chosen haunts.

Trapping Regulations

Necessary To Keep Close Check On Trapping In Northern Saskatchewan

Full regulation of trapping in Saskatchewan's hinterland is proposed by the Saskatchewan Government, according to Hon. A. C. Stewart, Minister of Highways, who returned from a trip to northern parts.

For supplies in the north states Mr. Stewart are being rapidly depleted and some form of regulation is vital. The proposal is to institute a system of licensed trap line. At present trappers who pay only a "trapper's license" are under the spr of keen competition, "cleaning out" what was formerly some of the best fur country in the province.

Aspen Poplar Found In All Provinces

Aspen poplar is one of the most widely distributed trees in Canada, being found in every province of the Dominion. Its northern limit extends almost to the Arctic Ocean, at the Mackenzie delta. From the wood of the aspen are made excelsior, boxes, and barrels for foodstuffs, and certain kinds of wood-pulp. Lumber made from it is difficult to season and very perishable. In the Prairie Provinces it is an important source of fuel.—Forest Service, Department of the Interior.

Old automobiles tires are being blown to bits by destructive insects in market gardens in Cavillon, France.

We've found a sure cure for insomnia. Instead of counting sheep we just imagine that it's time to get up.

"They have met, but how can they embrace?"—Greta Nostitz, Bucharest.

"Do you believe in the devil?"
"Rather. I married his sister."

Machine Invented To Skin The Fish Before Canning

Now even the salmon are getting skinned. An invention by W. F. Scholbach and his brother James of Ketchikan, Alaska, skins salmon preparatory to canning them. Little information on the machine has been given out by the brothers pending patents. Some 20,000 cans of salmon have been canned so far this season with the new machine, and the inventive brothers see great things in their branch.

Mistress—"Mary, while I was away you got my blue dress. I don't like it."

Maids—"Oh, madam! And I just love it."

Devotional Reading: Psalm 93:1-7.

Explanations and Comments

Twelve Spies Sent To Canaan, verses 1-8.—When encouragement was made at Kadesh-Barnea, near the border of the Promised Land, Moses sent twelve spies over the border to ascertain the nature of the land, whether good or bad, whether strong or weak, and also facts about how they lived, whether in cities, camps, or strongholds. He also directed them to bring back specimens of the fruit they found.

"The land was ready for the people, but were the people ready for the land?" The report which Caleb and his company was to bring was to decide, not a question of geography, but a question of philosophy. It was to test the present capacity of the people of God, to determine whether the heart of Israel was ripe for its inheritance.—George Matheson.

"What we do in the crisis always depends upon whether we see difficulties in the light of God, or God in the shadow of the difficulties."—G. Campbell Morgan.

The Journey Of The Spies, verses 21-25.—The spies returned to the camp and into the Valley of Eschol. They set out a branch with a single olive branch in their hands. Two men carried it on a staff between them. Eschol means a cluster, or a bunch. It was the olive branch which, at this incident, the writer of Numbers tells us. The spies also brought back pomegranates and figs.

The Majority and Minority Reports, verses 25-33.—On their return to Kadesh, the spies reported to Moses and Aaron, the congregation. This showed the fruit they had brought back and declared the land to be a land of milk and honey. It was the meaning of the expression "it flows with milk and honey." Honey was of great importance to the Israelites, for it took the place of our sugar. (Nevertheless, the spies hastened to add, for they were far more concerned to dwell upon the difficulties in the way than upon the attractiveness of the land, "the people that dwell in the land are strong, and the cities are fortified, and very great; we saw the children of Anak [giants] there.")

What a difference it would make if all the life of the world could be changed to what the cities were great, and yet God was greater, the giants were strong, and yet God was stronger.

Appetizing Salads

This Healthful Addition To Menu Has Been in Use For Many Days

The very appetizing—one could almost say "beautiful"—salads which are served today had their beginning in early Roman days when green uncooked vegetables were eaten with salt sprinkled over them. Cream was added by the Romans because its delicate green looked well in garlands. The ancestor of our modern lettuce and endive grew wild on the banks of the Mediterranean in ancient times.

Salads fell into disfavor for a time and many people, chiefly masculine, spoke slightly of salads as "rabbit fodder." There is nothing difficult about the preparation of a salad which has "appetite appeal." A salad, as it is at its best should have a beautiful dressing carefully blended with the other ingredients and should be as cool and crisp as possible. Care should be taken to arrange the salad daintily and garnish it attractively. Salad may be prepared in the morning and kept in the refrigerator.

Fish or meat salads are nourishing for the main course, a fruit salad may be served in place of dessert and a vegetable salad is both healthful and appetizing in place of hot vegetables. Most important of all is the salad dressing. While there are other types of dressing, two of the most popular are mayonnaise and boiled dressing. These two recipes can be made with evaporated milk which gives them a rich smoothness and body. The ten Minute Mayonnaise given is widely used because egg yolks are not needed.

TEN MINUTE MAYONNAISE

- 1/2 teaspoon salt.
- 1/2 teaspoon dry mustard.
- 1/2 teaspoon paprika.
- 1/2 teaspoon granulated sugar.
- Four grains cayenne.
- 3 tablespoons evaporated milk.
- 1 cup salad oil.
- 2 tablespoons vinegar or 1 tablespoon lemon juice.

Thoroughly mix dry ingredients. Add evaporated milk and blend thoroughly. Beat in salad oil gradually. Add vinegar, or vinegar and lemon juice, beating until mixture is smooth. Makes one cup.

A Costly Mix-Up

Perhaps the most unusual mix-up in magazine shops occurred recently in New York. Through a secretarial mistake, a famous writer told the same story to two magazines—a weekly and a monthly. It appeared in the weekly, while the monthly was on the press. The presses were stopped and the story removed at a five dollar expense, which the writer has naturally agreed to pay.

Canadian Clubs And Radio

Will Discuss Methods Of Co-Operation With Radio Commission

The executive committee of the Association of Canadian Clubs will approach the Dominion Radio Commission to discuss methods of co-operation. It was decided at the annual convention held in Regina.

The association took a definite step toward entering the radio field when, as part of the same resolution, it authorized the executive to prepare a series of addresses on public affairs in connection with the Dominion Broadcasting system which will shortly be established.

The understanding of the delegates was that the radio commission would be a fact in about two months time. Funds amounting to \$500,000 are already available for the work of the commission, which will establish a trans-Canada chain of powerful stations. It has been stated that among the first work to be undertaken by Premier R. B. Bennett will be the organization of the commission.

A further resolution passed by the delegates provides for the setting up of a series of study groups for an intimate review of national problems.

The Transient Problem

Fear Expressed That It May Produce a New Criminal Class

If the movement of unemployed transients from place to place is allowed to continue it will produce a new criminal class from which Canada has hitherto been practically free. This is one of the findings of the committee of the Canadian Bar Association on the administration of criminal justice, and forms part of the committee report.

To cope with the transient problem the committee recommends active enforcement of the vagrancy sections and other portions of the criminal code "which seem to have been held in abeyance."

Legislation which would impose on every community responsibility for the maintenance of indigents produced in that community, should be passed without delay, the committee urges.

Despite prevalence of conditions which might be expected to lead to crime there was no marked increase in criminality in Canada, during the past year, the committee finds, Canadians had remained law-abiding.

Air Transportation

U.S. Fleet Congratulates Canada On First Flight In Establishing Civil Aviation

Air transportation and radio communication will play a great part in carrying out the policies agreed upon at the Ottawa Imperial Conference, according to William P. MacCracken, Jr., of Washington, D.C. He urged Canada to promote aviation to its utmost.

Speaking before a service club meeting in Calgary, Mr. MacCracken, who is honorary secretary of the American Bar Association, declared aviation and radio would play an important part in future affairs. Mr. MacCracken is a pilot of distinction and was in Calgary attending the annual convention of the Canadian Bar Association. He paid tribute to the Canadian government in establishing civil aviation and to the aid which Canada rendered the United States when it started organizing civil aviation six years ago.

Among the world's highest mountains are two in India that are over 26,600 feet tall that have no names.

"Did you remember your step on in your will?"
"Yes, he won't get a penny."—Karl-katuren, Oslo.

Reindeer Herd For North

Herd Of 3,000 Animals Approaching Mackenzie River Delta

The herd of Alaskan reindeer being driven slowly eastward to the Mackenzie River delta to furnish a reserve food and skin supply for the natives of that district, has now reached a point between Canning and Sudbury Rivers less than one hundred miles from the Alaska-Yukon border.

Starting two years ago from the west coast of Alaska, the herd of about 3,000 animals has been driven along the coast line over most difficult terrain which made progress slow and laborious. No reasonably accurate estimate could be made as to the exact time it would take for the journey, owing to lack of knowledge as to the difficulties facing the expedition.

It was learned from the Department of the Interior, which is sponsoring the movement, that satisfactory progress has been made and the herd may be able to cross the delta of the Mackenzie on the ice this winter.

The object is the Kittigwain Peninsula, a long arm putting out into the Arctic Ocean just east of the mouth of the Mackenzie River. There three families of Laplanders, brought to Canada from their native land a year ago, are making all preparations for receiving and caring for the herd. They have built corrals, laid out grazing grounds and otherwise established themselves in readiness for their work.

The last of the United Kingdom delegation to the Ottawa Conference returned to England on the Cunard liner "Aurania" from Montreal. The party were headed by (left) H. B. Howorth, C.B., C.M.G., secretary of the United Kingdom delegation; Sir C. J. Howell-Thomas, K.C.B., C.M.G., head of the British Department of Agriculture; V. H. Boyse, M.B.E.—Cunard Photo.

End Lonely Vigil

Four Soviet Scientists Return From Bleak Arctic Wastes

Four Soviet scientists have ended a lonely two-year vigil in the bleak Arctic wastes of Northern Canada, during which their only contact with civilization was by radio. They have been relieved by four other observers, one of them a woman.

A brief wireless despatch from the icebreaker "Sibirskiy," now engaged in Arctic exploration, reports that the party of four, headed by the geographer, Ushakov, were taken aboard after the relief party, sent out aboard the icebreaker, had taken over.

The woman member of the replacement party is Iri Rusnova, who although she is only 30, is a veteran polar expeditionary work. With three male colleagues she will spend the next two years at the four outposts, whose only human inhabitants will continue their explorations and mapping of Northernland.

The four men who are returning were reported to be in excellent health despite the difficulties of their assignment.

Collecting railway tickets, first editions of newspapers and magazines, and bats for stoolball, the forerunner of cricket, is the hobby of an eminent London lawyer.

Chester: "And now?"
Ralph: "He knows the reason why."

World Court Is Fair

Smallest Nation Always Sure Of Getting Square Deal

The theory of the World Court and the League of Nations is that each nation has an equal say in the affairs, and equally certain of a square deal in any controversy. This was exemplified by the decision of the World Court handed down recently in a dispute between the small republic of Lithuania, and the mighty powers of Great Britain, France, Italy and Japan.

On the main point, which had to do with whether Lithuania had the power to sack a particular state official, the Court decided in favor of the republic.

It is a good thing that the international tribunals get a chance to show their impartiality sometimes, because it is a lesson to the world at large, and an assurance to the small nations that their interests are properly taken care of and no favour shown the big fellows.—St. Thomas Times-Journal.

The Perfect Dinner

When the Prince of Wales attended the recent military banquet at Albert Hall, London, England, he ate what world experts in dietetics hold to be the perfect dinner, of which he said he enjoyed it. It consisted of mutton, soup, boiled salmon, mutton, quail with salad and an ice.

Bowling greens to be used exclusively by coal miners have been opened at Stirling, Scotland.

"Tramp: 'The tidy next door' as 'given me a piece of home-made cake. Won't you give me something' too!"
Lady (siftily): "Yes, I'd better give you a digestive tablet." —The Humorist, London, England.

WORLD HAPPENINGS BRIEFLY TOLD

Construction of a Canadian legation building in Tokyo has been suggested to the Dominion government, but no decision has been reached.

Hugo Hilgarn, 65, pioneer mechanical engineer, inventor, manufacturer, economist and oldest member of the Franklin Institute, is dead. He invented the level gear generating process.

Sir William Grenfell, medical missionary to Labrador, believes Newfoundland should under no circumstances dispose of her Labrador territory.

A total of 124 wartime ships tied up at various ports of the United States have been ordered withdrawn from registry by the Shipping board paratary to scrapping them.

Rumors that Japan was increasing her naval strength at Shanghai, as circulated in Chinese newspapers, brought a sweeping denial from the Japanese consulate.

The Arm Club of France has recognized Maryse Hiltz as the maker of a new altitude record for women. August 19 she rose to a height of 31,500 feet.

Up to the end of July importations of United States antiseptics for the seven months of the calendar year had declined 90 per cent. compared with the corresponding period last year.

Intimation that a new trade agreement between Canada and Belgium is being considered by both governments was given at Quebec, by J. Van Rieck, consul general for Belgium at Vancouver.

Recipes For This Week

(By Betty Harcourt)

HOLLAND BEET SOUP

- 2 pint strong beef stock.
- 2 tablespoons sugar.
- 1 teaspoon grated onion.
- 2 tablespoons vinegar.
- 2 beets.
- Salt and pepper.

Add sugar, vinegar, salt and pepper, and grated onion to the stock. Boil together about ten minutes. Boil the beets in salted water. Peel and put through a coarse strainer. About five minutes before serving add beets to stock, heat and serve. Too long cooking will spoil the bright red color.

When The Turn Comes

Undoubtedly farm land values in the United States will have to be lowered and in the process fortunes will be wiped out. In Alberta only to exceptional cases will anything of this sort happen. The rule will be the contrary, which fact is certain to place farm owners of this province on a stable foundation when the turn comes.—Calgary Herald.

A hen-pecked man was informed that a Bengal tiger had escaped from a menagerie, and was chasing his mother-in-law.

"Why should I worry about what happens to a Bengal tiger," he answered.

EVERY WOMAN FEELS SHE SHOULD HAVE A WOOLLEN JACKET DRESS FOR FALL

AND WINTER

Here's a beauty. The jacket-like blouse can be made in either of two ways. In the large sketch, the rever neckline, which is so generally becoming and popular is just as smart as can be. The miniature view shows it in a more severe neckline type, which emphasizes the buttoned closing. The skirt is attached to a cambric top. Inverted plaid at either side of the front, provides ample fullness.

A brown-brown tweed mixture made the original. You'll be delighted with its small coat.

It's so simple to fashion.

Wool crepe, soft monotone woollen and rough crepe are also suitable.

Style No. 840 is designed for sizes 14, 16, 18, 20 years, 36 and 38 inches bust.

Size 16 requires 2 1/2 yards 64-inch, with 3/4 yard 36-inch for collar and 1 1/2 yards 39-inch lining.

Price of pattern 25 cents in stamps or coin (coin is preferred). Wrap coin carefully.

If a sufficient number of pupils are available, Mrs. G. M. Hughes of Cereal, will come to Oyen each Saturday to give pianoforte lessons. Please communicate with Mrs. Hughes at once, if lessons are desired.

Miss Mary Dyer left last week for Calgary where she will attend Normal.

The date of Mr. Fred Langford's sale has been changed to Thursday, Sept. 20.

Miss Alta Bouassa of the staff of the Grey Nunn's hospital, Regina, arrived in Oyen last Saturday, to spend a two-weeks vacation here. She is a guest at the home of Mrs. W. F. Pratt.

Rev. E. F. Kemp left this morning for Drumheller where he will attend the fall meeting of the Drumheller Presbytery.

Board and room for stu-
dents. Ten minutes walk from either Normal or "Teah". Apply: Mrs. R. Nisbet, 806 9a street, N.W., Calgary, Alta.

Where Love Light Fades
From the Mail-in Times
It is said that the who squeezes a dollar never squeezes his wife. In looking over our subscription list it is evident to us that many of the good ladies in this community are not receiving the attention they deserve.

Mr. and Mrs. S. A. Miller and son Bert, Bernice Kelly and Mrs. R. E. Gillespie, who left last Sunday for Calgary, returned to Oyen this evening.

Mrs. H. Mullens and baby daughter, who have been visiting at the home of Mr. and Mrs. C. Willison, returned to their home in Tessier, Sask. last Sunday with Mr. Mullens, who arrived by motor to take them.

Mr. and Mrs. Chas. P. Snyder who went to Calgary last Sunday, returned to Oyen by car Monday evening.

Miss Thelma Dial of Gull Lake, Sask., is visiting her father Mr. B. H. Dial.

Mr. F. C. Bliss returned to Oyen this afternoon from Cereal and has resumed his duties at the municipal chambers. His many friends are glad to see him back at work again.

OBITUARY
Collin Ferrie

A funeral service for Collin Ferrie, late of Excel, who died Sunday, Sept. 4, 1932, was held at the home of his father, three miles east of Sedalia, on Wednesday, Sept. 7, and interment followed at Cereal cemetery, Rev. J. D. Woolfart, of Cereal, conducting the services.

A large number attended the funeral and followed to Excel graveside to pay their last respects to their departed friend.

Floral tributes were many and beautiful including those of the family, Excel U.P.W.A., Excel Curling Club, Mr. and Mrs. R. E. Bishop, Mr. and Mrs.

Good Times
and
Bad

THE conservative policy of The Bank of Toronto has been influenced neither by prosperity nor depression. The Bank refused to be stampeded by the boom in 1896. It reaped a reward in its stability during the dark days of 1897. It still sought safety in the prosperity of 1893 and found its wisdom justified when, later, harvests failed and depression invaded agriculture and industry.

Building slowly, The Bank of Toronto has built well. Today it possesses the confidence of an ever-

widening circle of clients. Deposits have grown from \$263,000 in 1897 to over \$85,000,000 today. Assets total over \$113,000,000. Reserves exceed capital by fifty per cent. With this proven stability, with its present strength and experienced management, The Bank of Toronto is well equipped to serve your every banking need.

The Bank of Toronto has long been known as The Bank for Savings. Open an account and take advantage of its friendly, efficient service.

THE OYEN NEWS

DOWN in price

UP in quality

It is not often that quality climbs much higher while at the same time price slides away down. But that is just what has happened in the case of Goodyear tires.

Right now you're getting double the quality at half the price.

For example, a genuine Goodyear tire with Pathfinder tread and the famous Superwrist Cord—fully guaranteed costs—only

\$6.70

H. L. Bishop, Mr. and Mrs. Thos. Littleford, Mr. and Mrs. F. E. Thayer, Mr. and Mrs. C. A. Bishop, Miss F. McDonald, and others.

The deceased, who was 30 years of age, was grain buyer for the Alberta Wheat Pool at Excel during the last two years and in this service he made many friends in the community.

Besides his widow and infant son, he leaves to mourn his loss his father and mother of Sedalia and one brother Max, of Calgary.

Mrs. J. R. Anderson, Mrs. R. C. Anderson and daughters Ina and Gwenyth, who recently motored with Mr. A. O. MacArt, here to Lethbridge, Alta., where they visited Mr. and Mrs. T. O. Stephenson, have returned to their respective homes.

Mr. and Mrs. Geo. D. McMillan and family of Excel are home again after a holiday spent at the coast.

Mr. M. Kennedy is to be the pool agent at Excel for the coming year.

Among those from Excel who attended the funeral of the late Collin Ferrie, were: Mrs. C. A. Bishop, Mrs. F. E. Bishop, Mrs. R. E. Bishop, Mrs. H. L. Bishop, Mr. and Mrs. Thos. Littleford, Miss F. MacDonald, Mrs. C. R. Gullekson, Mrs. E. L. Gullekson, Mrs. S. R. Gullekson, Miss Thelma Gullekson, Miss Eleanor Elbertson, Mr. and Mrs. E. H. Church, Mrs. A. Wetherall and Mrs. Geo. D. MacMillan.

The following committees will be in charge at Oyen school fair on Tuesday, September 20.
Vegetables—Mrs. Chas. Stewart, Mrs. G. Langmuir and Alf Gibson.

Live Stock—Dr. J. P. Kerr and E. H. Church.
Flowers—Mrs. T. Lees.
Poultry—D. Warwick.
